BENEFIT

A Smart TV is an internet-connected television that offers a range of online features, such as on-demand content from apps like BBC iPlayer, ITV Hub and All 4, access to streaming services like Netflix, and the ability to connect to other wireless devices like smartphones.

The main benefit of a smart TV is access to many channels that offer TV programs, movies, and music without the need to connect a TV antenna or subscribe to a cable/satellite service. Also, some Smart TVs provide web browsing, gaming, and access to compatible media content stored on your computer.
